

MiniBTC is a new community-driven DeFi token on the Binance Smart Chain that is an automatic liquidity providing protocol that pays out static rewards to holders.

About

Our goal is to give a second chance to those people who did not have time to buy bitcoin in 2009-2013. We also want and will help orphans, children with disabilities and health problems. Children are our future and we, like no one else, know and understand this, because each member of our team is a father or mother. That is why we decided to create a coin like MiniBTC. As an example, we took bitcoin and divided it into MiniBTC along the chain using smart contracts. 1 bitcoin made 1 million MiniBTC. MiniBTC has faster speeds, lower fees, and is much

greener and much more convenient in the DeFi sector.

Our tokenomics

The initial coin offering will take place on the Pinksale service, and the 100% liquidity of our coin will also be blocked there.

In total, we have issued 21 trillion coins which will be distributed as follows:

38% will be available for presale

37,1% will be added to the liquidity pool

9,9% will be burned

5% - Airdrop

5% - Team

5% - Private Sale

our smart contract has a redistribution function, this means that 5% of all transactions will be distributed to all holders of our coin.

since 9.9 percent were burned, then for each transaction, out of 5% of redistribution, 9.9% will be burned - which will reduce the number of coins

Also, 4% of each transaction will be added to the liquidity pool 100% of which is locked for 10 years

1% of all transactions will be redistributed to charity wallet

Roadmap

Birth

Smart Contract - launch & verify at bscscan Website launch
Social media marketing launch Litepaper

Security & KYC audit

Phase 1

Private sale

Presale at Pinksale

1 Phase of marketing

1000 Holders

MiniBTC charity foundation

CMC & Coingecko Listing

Phase 2

5000 Holders

Third party audit

First voluntary donation + charity partnership

Searching for new team members

Phase 3

25 000 Holders

Influencer marketing push

First Airdrop

Donations to our charity partners

Phase 4

MiniBTC swap

50000 Holders

More Donations to our charity partners Website redesign

Phase 5

MiniBTC swap airdrop

200000 Holders

Phase 6

Soon update

Donations to our charity partners

TEAM

We want to be open in relation to our community and instead of a heap of text and a one photo in linkdin or twitter, we decided to leave our Instagram pages in

**contacts. so that you all can see our working moments
and moments from our lives**
